

ARKA qualification file

Clinician x service

NPI: 1234567893

Clinician: Jordan Hale, MD

Specialty: Diagnostic Radiology

Organisation: Example Radiology Group

Service: 72148 - MRI lumbar spine without contrast

WINDOW

2024-09-01 to 2025-08-31 (inclusive)

Eligible decisions in the window: 50

Texas amended HB 3459 via HB 3812 in 2025 partly because the evaluation window was too short for clinicians to qualify, so the window is a contested parameter and is stated here, never implied.

COUNTS

WHY MOST DECISIONS ARE NOT IN THE RATE

Decisions in evaluation extract 68

- not the named service 18

= ELIGIBLE DECISIONS 50

approvals 48

denials 2

STATISTIC

Raw approval rate: 96.00%

Wilson lower bound: 86.54% (95% confidence)

Threshold: 90.00% source: statute

Jurisdiction: Texas (TX) verified

Texas HB 3459, 87th Legislature (2021), as amended by HB 3812, 89th Legislature (2025) (statute); Texas

Insurance Code Chapter 4201, Subchapter N. Enrolled HB 3812 effective 2025-09-01.

This is a lower bound. The true approval rate (Wilson) is higher than this figure with 95% confidence.

A clinician close to the threshold on a small sample will qualify later rather than never.

DETERMINATION

qualified

Observed approval rate meets the stated threshold on a sample of 50 eligible decisions.

ARKA computes qualification against the stated threshold. This file does not grant an exemption; the plan decides.

PROVENANCE

ARKA version: 0.1.0

Method version: goldcard-qualification-file-1.0.0
